MMAM: Miraculous Medicinal Alcohol Mix®™

An optometrist told me years ago: *"You have the onset of macular degeneration in your eyes."* On a road trip to Denver, black blotches of *macular degeneration* partially obscured my eye sight. For the return trip from Denver to Vancouver, I had to disinfect my two week drinking water supply. For every ten liters of water, I added about one tablespoon of VODKA (i.e., 4 cc Ethanol). It worked:

- The alcohol served as a disinfectant. For the next two weeks I drank only alcoholized water.
- And to my surprise, the black blotches of *macular degeneration* in my sight vanished, likely, because alcohol is on record of dilating blood vessels, which stimulates blood circulation.
- The optic nerve was cleansed from obstructions. The black blotches are gone ever since.
 - **Macular Degeneration** was reversed to **Macular Regeneration**.

If a constant supply of minute amounts of alcohol dilates microscopically small blood vessels, promotes circulation, restores optic nerve function and reverses degeneration, what will it do to nerves, injured by MS, blocked arteries in heart and brain, which cause heart attack and stroke?

(Continuous, medicinal use of diluted alcohol is prescribed since antiquity. Cf. Bible: 1 Timothy 5: 23)

--- Recommended Trial: Drink **MMAM®™** incrementally and consistently at least 2 weeks. ---
